NOTES AND COMMENTS *continued from page 152*

THE ANNUAL GENERAL MEETING

The British Agricultural History Society's twenty-second AGM was held at Weymouth College of Education, Dorset, on 9 April 1974, with Mr George Ordish in the Chair. Mr John Higgs, the first Secretary of the Society, was elected President in succession to Professor W. G. Hoskins; and Mr C. A. Jewell and Mr M. A. Havinden were re-elected Treasurer and Secretary respectively. The three vacancies on the Executive Committee were filled by the re-election of Dr E. J. T. Collins, Professor W. E. Minchinton, and Dr Joan Thirsk.

In his report Mr Ordish noted that the membership now stood at 774, the distribution being 422 Ordinary members, 62 Institutional members, and 290 Library members (63 of the Ordinary and 136 of the Library members being foreign). A one-day joint conference with the Veterinary History Society would be held in London, probably on Saturday, 30 November 1974. The Executive Committee proposed to hold the 1975 Spring conference at Cardiff, but after discussion of a suggestion from the floor that a venue in the north-west of England would be more convenient, it was agreed to seek a suitable site in Shropshire or nearby. The dates would be from Monday, 7 April, to Wednesday, 9 April 1975. It was also agreed to seek to hold the 1976 conference near Cambridge, where the Economic History Society would be holding their Fiftieth Jubilee conference. The Chairman regretted that David and Charles

of Newton Abbot had withdrawn from their agreement to publish the translation of Professor Wilhelm Abel's *Agrarkrisen und Agrarkonjunktur*, which the Society had financed, and that the Executive Committee was now approaching the Oxford University Press.

The Treasurer presented the accounts and reported that income had exceeded expenditure by £2,148. This reflected the benefit arising from the recent rise in the subscription, but unfortunately the rapid rise in printing costs, if continued, would soon erode the Society's finances again, unless it could be offset by a steady annual increase in the membership. The accounts were adopted.

The Secretary read the Editor's report in his absence. Articles were coming in at the rate of about thirty-six a year, and since only ten could be published, this involved a regrettably high rejection rate. A large proportion of the articles dealt with nineteenth-century topics, which involved a long delay in the publication of articles on that period. He proposed to reduce this by devoting a whole issue to problems of nineteenth-century farming. He was, however, still short of good articles on earlier periods, and of brief articles in general. He would welcome comments and suggestions from the members. In response it was suggested that the Journal did not always need to keep to an even chronological spread and that it might be desirable from time to time to devote issues to particular topics or problems.
